

DHI provides services within Life Science covering consumer products such as drugs, medical devices and chemicals. DHI is your professional partner in both discovery and preclinical development.

We are there for you when you want to discuss development strategy, need non-clinical assistance or require testing of pharmaceuticals (small molecule, biopharmaceuticals, cellular and gene based therapy as well as medical devices).

With almost 30 years of experience in toxicology we combine knowledge from several industrial fields for the benefit of our clients in the pharmaceutical industry.

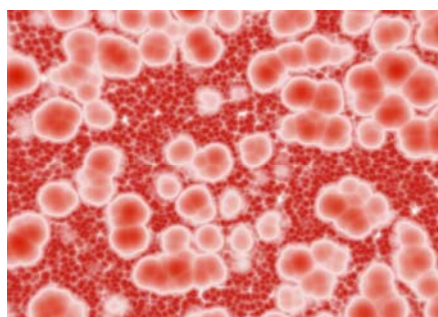

Discovery support

- Tox screening
- Literature search and screening
- Identification of metabolites
- Tox profiles of metabolites

Preclinical support

- Clarification of specific documentation for relevant authorities
- Design of optimal non-clinical package
- Selection of contract laboratories and contract offers
- Evaluation of test protocols and study reports
- Project management, CRO contact and monitoring
- Preparation of IND
- Ecotox testing
- Tox assessment of impurities

DHI is approved by the Danish Ministry of Science, Technology and Innovation to ensure knowledge to value through bridging businesses and universities.

DHI is a worldwide company with 900 employees, 350 based in Denmark.

Regulatory support

- Non-clinical eCTD modules and SEND formats
- Dossiers, Investigator's brochure (IB) and investigational medicinal product dossier IMPD
- Material Safety Data Sheets
